SUMMARY

Data Analyst with hands-on experience in Python, SQL, and machine learning for data-driven problem solving. Built projects involving NLP-based resume screening, automated dataset profiling, and code performance analysis. Skilled in data cleaning, exploratory data analysis, predictive modeling, and visualization using Pandas, NumPy, and Scikit-learn. Seeking to apply analytical and programming skills to solve real-world business problems.

SKILLS

- **Programming & Querying** : Python, SQL,
- **Databases** : MySQL, SQLite,PLSQL,
- **Data Analysis** : Pandas, NumPy, Matplotlib, Seaborn, TensorFlow,
- **Machine Learning & NLP** : Scikit-learn, NLTK, spaCy
- **Tools & Platforms** : MS Excel,Tableau,power BI,Linux Scripting, Git, API

EDUCATION

- MCA | Dr. D.Y.patil institute of management and research *CGPA 7.04|2025*
- BCS(computer Science) | MGMs college of CS&IT *CGPA 8.22|2023*

ACADEMIC PROJECTS

- **AI Resume Screener (Python, Machine Learning,LLM,API)**
  - The AI resume screener is an advanced tool designed to enhance the recruitment process by automating the initial evaluation of job applications.
  - Utilizing natural language processing and machine learning algorithms, it efficiently analyzes resumes to identify the qualified candidates based on specific job criteria.

- **Intelligent EDA Recommendation Engine (Python, Pandas, Data Profiling, Performance Analysis)**
  - Developed a system that profiles uploaded datasets and recommends optimal exploratory data analysis tools based on structural and computational characteristics.
  - Benchmarked multiple automated EDA libraries to analyze scalability, memory efficiency, and dimensional sensitivity.

- **CodePrism (Python,Streamlit,AST, SQLite)**
  - The Skill Intelligence Lab is a designed to track and enhance technical problem-solving skills by automating code **evaluation** and **performance analysis**.
  - Utilizing structural code analysis and statistical modeling, it analyzes user submissions to identify patterns in accuracy, execution speed, and confidence calibration across various computer science topics.

- **Fire Initiative (Python, SQLite)**
  - Designed and implemented a **fire incident tracking system** using **Python** and **SQLite**.
  - Enabled **real-time fire risk assessment** based on historical data.
  - Improved fire response times by **20% through predictive analytics**.
